GENERATIVE ARTIFICIAL INTELLIGENCE
INTEGRATION

Definition

Artificial Intelligence

Artificial intelligence is a branch of computer science focused on creating machines capable of performing tasks that typically require human intelligence, such as learning, problem-solving, and decision making.

Definition

Generative Artificial Intelligence

Generative artificial intelligence refers to a type of AI that can create new content, like images, music, text, or code, by learning from existing examples and understanding how to produce similar, original works.

We guide the architects

We guide the way (ooh-yeah!)

Engineering is the way

The LawGeex Artificial Intelligence system surpassed the average accuracy rate of lawyers by achieving an average of 94%; **9% better than the average lawyer**. On average, it took lawyers **92 minutes** to complete all five NDAs. In comparison, the AI engine accomplished the same task in just 26 seconds.
